

# How to take the petition offline to collect signatures

We would love you to help us increase the reach that the online petition has, by taking it offline.

Do you know of an event or market where people might like to sign on?

Are you part of a group that would like to know about the campaign?

It's really easy to do:

1. Download the PDF file **Petition Signature Form** for collecting physical petition responses.
2. Download the QR poster code for your audience to scan and sign online.
3. Print as many hard copies of both documents as you think you will require for the event.
4. Check the final posting date (May 10, 2021) and organise your signing event leaving enough time to get the signed forms in the post by this date.
5. When people are signing the petition forms, make sure they include their names and their signatures. Without their names clearly written, their signatures will not be counted. Please note the email address column is optional.
6. After your event, using the address on the bottom of each form, send the original signed copies by mail to the address. Each signature counts; so write legibly and include a return address.

And make sure you check out our *Hot tips and ideas to engage and inspire audiences and individuals to sign the petition.*
